LED LIGHTS

The types of water flow...

RAIN

As the name suggests, the water from shower creates rain like effect giving both energizing and revitalizing.

CASCADE FALL

Feel the soothing effect of water as it flows down in a cascade creating a revitalizing spa experience as you relax. The gentle sound and feel of water rejuvenates along with the powerful massage.

MIST EFFECT

Sort of surrounds you with a thick mist of tiny water droplets. There's no stream of water projecting toward you. The tiny droplets spread out inside the shower space and consume you. It's like a steam room, but one that, well actually gets you clean.

INTENSE

A mode of shower which is produced at much higher pressure than rain shower and cover a specific area unlike rain shower this mode is sure.
